

eSales Analyst 2020.05.02 - Release Notes

Note: All previous releases with these new ones.

Major fixes / Improvements

- Remove `only no. of characters can be entered` restriction from fields in all forms e.g. `Add Bank`
- Fix: `Outstanding` -> `Search Record` -> When custom is selected date pickers (to & from) opens but not hide when selecting some others value
- Change Shortcut of `Sales Man` to **Alt + M** from `ALT + R`
- Change Shortcut of `Stock Return` to **Alt + R** from `Alt + M`
- Add **UOM** column in Product Details
- Fix: `Accounts Receivable`: User can't easily know, **if info on footer is for selected record or overall** (Now, when nothing is selected in first table, record is for overall and if selected info is for only selected item)
- Fix: `Accounts Payable`: User can't easily know, **if info on footer is for selected record or overall** (Now, when nothing is selected in first table, record is for overall and if selected info is for only selected item)
- Fix: `Bank Statement`: User can't easily know, **if info on footer is for selected record or overall** (Now, when nothing is selected in first table, record is for overall and if selected info is for only selected item)
- Fix: Search by multiple criteria at the same time
- Now search in all field is by partial match (not whole word)
- Fix: Sometimes **numeric values show in exponent from (E)**.
- Set **amount (Rs) values up to 2 decimal places & quantity to 4 decimal places**
- Fix: Sometimes changing quantity not refresh footer amount in Invoice.
- **Auto insert 1 value in quantity field** in invoice.

Breaking Changes

-

Minor or other Extra fixes / improvements

- Implement Loading Bar when printing / viewing reports
- Add also `save` only button to just save invoice (without printing) in **New Invoice**
- Always refresh records when `From` date is changes
- By default hide `Purchase Price` column in **New Invoice**
- Move `refresh` button to very last (after Report button)
- Now when refresh button is pressed table view selected row remain same (doesn't changed)
- Set Search search criteria on Select from auto list or press enter button in all software.
- In view forms `search data` when **enter button is pressed or some value is selected** form dropdown list
- Fix: Sometimes `message box` moves back of the software
- After `save data` form Insert form **move focus to first field** automatically

- Fix: If not any row is selected in table view and delete button is pressed in some forms [Product detail, Price list, Bank Details, Expenses Details, Task Details], **message box doesn't show e.g. No row is Selected**
- Fix: Serial no column in table view must not be shorted, must always starts form 1 and any number should not be missing
-
